EDUCATION

Vignans Institute of Management and Technology for Women
Bachelor of Technology, CSE(AIML)

Hyderabad, TS
Dec 2021 – Jul 2025

EXPERIENCE

AI Intern

Oct 2025 – Jan 2026

UptoSkills

Remote

- Worked on chatbot-based AI modules, including a Task Breakdown Engine and Response Engine with emotion detection.
- Applied AI and ML techniques to support conversational workflows and response intelligence.

AI and Cloud Technologies Intern

Sep. 2025 – Oct 2025

IBM SkillsBuild

Remote

- Developed and trained NLP-based machine learning models using Python and Hugging Face Transformers.
- Performed text preprocessing, feature extraction, and model evaluation for NLP use cases.

Intern

Sep 2025 – Oct 2025

VOIS

Remote

- Conducted LLM-assisted exploratory data analysis on Netflix and Airbnb datasets.
- Used large language models to support insight generation related to content trends, pricing patterns, and customer behavior.

Artificial Intelligence and Machine Learning Intern

Sep. 2025 – Oct 2025

GlobalNext Consulting India Private Limited

Remote

- Collaborated on a predictive analytics system using CTGAN to address data scarcity and class imbalance.
- Supported model evaluation, visualization of insights, and preparation of technical documentation.

PROJECTS

MedSynth Predictive Healthcare Analytics System | *Python, ML, Streamlit, NumPy, Matplotlib*

Oct 2025

- Built a machine learning-based prediction model to assess multi-morbidity health risks
- Preprocessed and cleaned structured healthcare data to improve training quality
- Evaluated model performance and optimized accuracy 95 percent.

Fake News Detector | *Python, BERT, NLP, ML*

Oct 2025

- Built an NLP-based Fake News Detection system leveraging Transformers to analyze text and URLs for credibility, achieving 90-92 percent accuracy across evaluations.
- Integrated a real-time Streamlit interface with reliability scoring and visual indicators for intuitive user understanding

TECHNICAL SKILLS

Languages: Java, Python

AI and LLMs: Artificial Intelligence, Machine Learning, Large Language Models, Hugging Face Transformers, BERT

NLP and Conversational AI: Natural Language Processing, Text Classification, Emotion Detection, Chatbot Systems

Data and Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly

Frameworks and Tools: Tensorflow, Scikit-Learn, Git, GitHub, VS Code, Streamlit

PUBLICATIONS

Sentiment Analysis of Incoming Calls On Help Desk | *Journal of Information Systems Engineering and Management*

- Published a peer-reviewed study on real-time sentiment analysis of helpdesk calls, integrating speech processing and NLP techniques to support multi-agent performance monitoring.
